ROOTED CLUMPS and PLANT LIST MAIL ORDER ONLY

DOROTHY A. YOUNG

2937 Rutland

DES MOINES 11, IOWA

BASIC LIST FOR 1960

Rooted clumps to be sent by parcel post, special handling. If you wish Special Delivery or Air Mail service add the charges for same. Fifty-five cents for Special Delivery—check with your local post office for charges on air mail per pound to your zone. ALL ORDERS MUST BE ACCOMPANIED BY A \$1.00 HANDLING FEE. This fee will help to cover packing expense, postage, special handling, and no order will be accepted unless this handling fee is included. Iowa customers must also include 2% tax as required by state law—unless you are a dealer and have a sales permit, in which case please give us your permit number for our records.

Orders will be filled in the rotation in which we receive them—those reaching us first will be filled first—please do not ask us to deviate from this rule. We will start to ship as early as weather permits in the spring—it usually takes about six weeks to become “caught up” on winter and spring orders. After that period orders will go out within a day or two of the time they reach us. WE SHIP ONLY TO CONTINENTAL U. S. We do Not ship during cold weather nor during excessively hot weather.

When ordering please list a few substitutions. We will not substitute unless absolutely necessary, but reserve the right to do so unless you have stated otherwise, in which case we will make refund if necessary.

Our rooted clumps are PLANTED LEAVES WITH YOUNG PLANTLETS ATTACHED—whatever the leaves have produced. The exception to this is an occasional very new variety or a slow growing variety, in which case you will receive a well rooted leaf which should produce plantlets for you in a very short time. Also, sometimes cuttings become of good size and we find it necessary to remove the parent leaf. We think it would be better if you do not separate young plantlets from the mother leaf immediately—let them grow on as received for a sufficient time for them to become acclimated to their new surroundings, then follow your usual methods.

We guarantee safe delivery of your orders but cannot be responsible for their performance after you have received them, as we cannot control the conditions under which they will be grown after leaving us. If your order is damaged in transit or otherwise not in good order, please return immediately for adjustment or refund. No adjustment will be made unless this is done immediately.

You will notice that we list many pink and white varieties. All are lovely and we recommend them—however, many do have a tendency to go back to solid coloring. As time goes on they will probably become dependable, but at present they are extremely new. Our guarantee on these, as on everything else we offer, is that the leaves were taken from plants which DID bloom true to description. The words “red” and “rose” are often used in African Violet descriptions and are sometimes misleading to those uninformed about African Violets. There is no true red—although the hybridizers are very, very close! “Rose” is sometimes used as part of a name or in a description and it means an orchid rose or lavender, NOT a deep pink as many seem to think. We offer this information in an effort not to mislead. Recently many varieties have come upon the scene with a chartreuse edge or fringing. Again—the chartreuse is not dependable under all conditions. As with the pink and white, they are becoming more dependable, but we cannot give an iron-clad guarantee. We suggest that if the bloom does not have the chartreuse edge, then try another location for your plant and see if it does not perform more satisfactorily.

It is difficult to always describe colors accurately as they appear differently under various conditions. (If you raise your violets under fluorescent lights try placing one under an incandescent light or in the strong light of a window—you’ll see what we mean!)

Many multi-colors will revert, although we try to offer varieties that are tried and true. Each leaf is taken from a parent plant that has bloomed true to name.

When foliage is not described it is of standard type.

Iowa customers who wish to pick up their orders may do so. Send your order by mail, tell us the day you wish to pick it up and it will be packaged for you before you arrive. We do not, however, admit visitors to the violet rooms, since we raise the rooted clumps primarily for the mail order trade.

All orders contingent on stock on hand at time of shipment.

ROOTED CLUMPS

50c each unless otherwise specified. Limit two of a variety per order. \$1.00 handling charge per order. 2% sales tax, Iowa customers only.

ARTIST'S DELIGHT (LYONS)—dbl. purple, dark glossy foliage. 75c

PLANTS

These are young plants for your 2" or 2½" pots, and will be available ONLY during the spring season. When ordering please specify "Plants"—otherwise we will assume that you wish rooted clumps when available in that variety. All plant orders to be accompanied by a handling charge:—\$1.00 for 1 to 20 plants, \$1.50 for 21 to 30 plants, \$2.00 for 31 to 40 plants, etc., at the rate of 50c for each additional ten or portion thereof. (2% State Tax must also be included from Iowa customers only.) Orders will be sent by Parcel Post, special handling. Limit two of a kind per order.
